Summary

Full-stack developer who ships complete, tested products from scratch - AI-powered web apps, SaaS with auth and live data, and offline-first PWAs. Comfortable across the stack: Next.js, TypeScript, serverless APIs, and LLM integration (Claude, Groq). Open to full-stack, front-end, or AI-adjacent product roles in Tokyo or remote.

Projects

Wander

2026

Next.js · TypeScript · Claude API · Supabase · Framer Motion · Mapbox

- Built an AI travel-discovery app with a multi-mode interface - natural-language chat, guided choice chips, and one-tap Surprise Me - powered by the Claude API
- Engineered 5 API routes: destination suggestions, packing list, itinerary builder, similar-destination finder, and item enrichment
- Implemented 3D card tilt with image parallax, a cinematic stagger reveal, and an animated aurora background with Framer Motion
- Built result caching in Supabase with SHA-256 preference hashing - "show more" bypasses cache to return fresh destinations every time

Verba

2026

Next.js · TypeScript · Tailwind CSS · Web Speech API · PWA · Vitest

- Built an offline-first vocabulary trainer for language exams - audio-first recall via the browser's SpeechSynthesis API, so it speaks with zero network and no audio files
- Engineered a Leitner spaced-repetition core as pure, deterministic functions with injected time, covered by 157 unit tests; units unlock by mastery, not a fixed calendar
- Designed a modular multi-course engine - a new language or test is one data file plus one registry line, with no change to the scheduler
- Shipped an installable PWA with a hand-written, unit-tested service worker - pages network-first with a cached fallback, assets cache-first; Next.js static export enforces the offline constraint at build time

RetireAI

2026

Next.js · TypeScript · Tailwind CSS v4 · Supabase · Claude API · Recharts

- Built a retirement-planner SaaS with savings projections, scenario comparison, and Claude-generated personalised reports
- Integrated Supabase auth and PostgreSQL with Row-Level Security for secure per-user data
- Built a secure server-side API route to call the Claude API - the key is never exposed to the client
- Created interactive projection charts with Recharts, deployed to Vercel with managed environment variables

AI Handbook Generator

2026

JavaScript · Vercel Edge Functions · Groq (Llama 3.3 70B) · pdf.js

- Rebuilt from a Python/Gradio prototype into vanilla JavaScript on a Vercel Edge Function backend
- Architected a two-mode API - one fast outline call, then one streamed call per section - so the browser orchestrates a multi-minute generation within serverless time limits
- Streams each ~1,200-word section live via the Groq API, with client-side PDF text extraction using pdf.js
- Keeps the API key server-side behind the edge function, with Markdown export of the finished handbook

Skills

Languages: JavaScript, TypeScript, Python, HTML, CSS, C# (foundational)
Frameworks & Libraries: React, Next.js, Tailwind CSS, Node.js, Framer Motion
AI & Data: LLM API integration (Claude / Groq / xAI), RAG pipelines, pgvector, prompt engineering
Back-End & DBs: REST & serverless API routes, Vercel Edge Functions, Supabase, PostgreSQL (RLS), Resend
Front-End & PWA: responsive UI, accessibility, service workers, offline-first PWAs, static export
Testing & Tooling: Vitest, Git, GitHub, Vercel, VS Code

Certifications

Meta Front-End Developer Professional Certificate

Meta / Coursera

Foundational C# with Microsoft

freeCodeCamp

Experience

English Instructor

Yaruki Switch Group · Tokyo, Japan

- Teaching across multiple age groups and proficiency levels in a high-volume, fast-paced environment
- Designing lesson materials from scratch - clear structure, measurable outcomes, adapted per learner
- Working within a larger team across branches - communication, handoffs, and consistency across instructors

Mar 2026 - Present

English Instructor

NOVA Co. Ltd. · Fukuoka, Japan

- Planned and delivered structured lessons across varied skill levels and backgrounds
- Adapted communication style to individual needs - strong habits in problem diagnosis, clear explanation, and iterative improvement

Jun 2022 - Dec 2025

Education

Bachelor of Business Administration

Ritsumeikan Asia Pacific University, Beppu, Japan

2017 - 2022
